EXPERIENCE

•Flutterflirt

- Software Developer (1+ Years Experience)* Jan 2025 - Present
- Built and maintained scalable backend services using **Node.js, Express.js, MySQL, PostgreSQL, MongoDB, handling API requests with optimized response times.**
 - Designed and implemented RESTful APIs with JWT authentication and RBAC, improving system security and access control.
 - Optimized MySQL queries, reducing API response time by 25–30%.
 - Collaborated with frontend and product teams to deliver high-performance features in an agile environment.

TECHNICAL SKILLS AND INTERESTS

Programming Languages: JavaScript, C++, SQL
Backend: Node.js, Express.js
Frontend: React.js
Database: MySQL, PostgreSQL, MongoDB
Tools: Git, GitHub, Postman
Concepts: REST APIs, JWT Auth, RBAC, OOP, DSA
Cloud: AWS (EC2, S3)

PROJECTS

•TicketHub [Project Link](#)

- Developed a full-stack ticket booking platform using modern web technologies to enable seamless event and movie ticket reservations.*
- Built responsive and user-friendly interfaces with secure authentication, booking workflows, and real-time seat availability management.
 - Implemented JWT authentication and RBAC, securing APIs and preventing unauthorized access.
 - Designed scalable REST APIs with proper validation and error handling, improving reliability.
 - Structured database schema to efficiently handle service requests and vendor workflows.

•Kaveri Engineering [Project Link](#)

- Developed a secure backend for an Employee Management System*
- Built an Employee Management System backend with Node.js and MySQL handling employee records, attendance, and leave workflows.
 - Implemented secure authentication system using JWT and role-based authorization.
 - Designed APIs for attendance tracking (punch-in/punch-out), reducing manual HR effort.
 - Improved operational efficiency by digitizing employee workflows.

•Workday-AI-Auto-apply-Extension [Project Link](#)

- Developed an AI-powered Chrome Extension to automate Workday job applications using React.js, Node.js, Express.js, MongoDB, and G*
- Integrated Gemini API for intelligent resume parsing, dynamic field mapping, and AI-based response generation with optimized quota handling and fallback mechanisms.
 - Implemented advanced browser automation including multi-step form handling, React-controlled input autofill, dropdown selection, and dynamic DOM field detection.
 - Designed scalable backend REST APIs for resume upload, parsing, field mapping, caching, and application management with proper error handling and environment security.
 - Deployed the full-stack application on Vercel and Railway/Render, improving job application efficiency by automating repetitive manual processes.

ACHIEVEMENTS AND CERTIFICATIONS

Solved DSA problems on LeetCode focusing on data structures and problem-solving. — [LeetCode](#)
Achieved the **100 Days Badge** for consistent problem-solving on **LeetCode**.
Received a **Certified in C++ and SQL (HackerRank)** from **HackerRank**.

EDUCATION

•AMC Engineering College, Bangalore

Bachelor of Education (B.E) in Information Science and Engineering 2024

•LND College, Motihari-Bihar

Indian School Certificate (ISC) – Class 12th 2019

•SJS Public School , Motihari-Bihar

Central Board of Secondary Education (CBSE) – Class 10th 2017
